

Arista Cloud Engineer Level 4 - Cloud Professional

Seminar-ID: ACE_L4

Your key takeaways

The ACE Level 4 course is focused on more advanced DataCenter, DCI, WAN and Service Provider architectures. Engineers will explore the advanced routing capabilities available within Arista hardware and EOS. Topics such as leveraging VXLAN and MPLS between data center sites, leveraging IS-IS and OSPF for underlay routing, and Segment Routing will be discussed in depth. Advanced routing configuration and troubleshooting within service provider connectivity will be examined. Arista's hybrid cloud solution leveraging AnyCloud and vEOS will also be covered.

Topics At-a-Glance:

- Advanced Routing and Service Provider Connectivity with BGP and IS-IS
- iBGP, IS-IS, OSPF in LS
- Policy-based Routing & Route Maps
- DCI with EVPN/VXLAN/MPLS
- FlexRoute – Internet & WAN Routing
- MPLS
- Segment Routing
- SR-TE – EVPN MPLS L3VPN
- AnyCloud – vEOS & cEOS
- Hybrid Cloud with AWS, Google, Azure
- CVaaS

The ACE Level4course is best suited for individuals with more than 5 years of experience in the Network Engineering Field and are comfortable with routing protocols. Mid-to-senior level Network Engineers and Operations staff will find the skills most often searched for by corporations for these positions. Those individuals holding current or expired Professionalcertifications in other vendor programs will find a refreshed and updated approach. ACE:L4 focuses on the features and skills needed in advanced networks. You will not waste energy learning outdated technologies, approaches or tasks no longer used in open networks.
